Allowable Subject Matter

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Taylor et al (US 6,512,487) discloses a phased array antenna comprising a substrate; an array of dipole antenna elements on the substrate, each dipole antenna element comprising a medial feed portion, and a pair of legs extending outwardly therefrom, adjacent legs of adjacent dipole antenna elements including respective spaced apart end portions. Taylor, however, fails to further teach a respective impedance element electrically connected between the spaced apart end portions of adjacent legs of adjacent dipole antenna elements for providing increased capacitive coupling therebetween.

Claims 2-15 are allowed for depending on claim 1.

Regarding claim 16, Taylor et al discloses a phased array antenna comprising a substrate; an array of dipole antenna elements on the substrate, each dipole antenna element comprising a medial feed portion, and a pair of legs extending outwardly therefrom, adjacent legs of adjacent dipole antenna elements including respective spaced apart end portions having predetermined shaped and relative positioning. Taylor, however, fails to further teach a respective impedance element electrically connected between the spaced apart end portions of adjacent legs of adjacent dipole antenna elements for providing increased capacitive coupling therebetween.

Claims 17-20 are allowed for depending on claim 16.

Regarding claim 21, the phased array antenna structure of Taylor et al would enable the method comprising the steps of providing a substrate; forming an array of dipole antenna

elements on the substrate, each dipole antenna element comprising a medial feed portion, and a pair of legs extending outwardly therefrom, adjacent legs of adjacent dipole antenna elements including respective spaced apart end portions. Taylor, however, fails to further teach the step of electrically connecting a respective impedance element between the spaced apart end portions of adjacent legs of adjacent dipole antenna elements for providing increased capacitive coupling therebetween.

Claims 22- 33 are allowed for depending on claim 21.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
